#### **DETAILED ACTION**

Claims 1-20 are presented for examination.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 5, 13, 14, 15, 17, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsui (Matsui – 5,897,669).

Art Unit: 2876

Regarding claim 1, Matsui discloses a 2D code comprising marker dots, data dots, address dots and pattern dots. Figure 8 of Matsui shows a various entries which are used to indicate whether the dot is a data dot 1 or a data dot 1, and whether it is a marker dot.

As can be seen, Matsui discloses the claimed invention.

Regarding claim 5, as can be shown in Figure 8, each entry can be independently interpreted according to the color of the indicator.

Regarding claim 13, see figure 1A of Matsui where the data dots are bounded by 4 marker dots.

Regarding claim 14, the marker dots are considered as the claimed locator component.

Regarding claim 15, see Figure 1A of Matsui.

Regarding claim 17, the examiner is of the view that the black marker dots are printed as continuous tone dots.

Regarding claim 18, see the discussions regarding claim 1.

Regarding claim 19, see the discussions regarding claim 1.

## Allowable Subject Matter

Claims 2-4, 6-12, 16, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2876

The following is a statement of reasons for the indication of allowable subject matter: The prior art disclose various 2D matrix codes. However, the prior art fails to disclose a specific code comprising a tag format structure having a plurality of entries wherein each entry includes a low order bit which is used to indicate whether or not the associated data dot is data or not in the manner as recited in claims 2-4.

The prior art also fails to disclose the limitations of claims 6-12, 16, and 20.

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thien M. Le whose telephone number is (571) 272-2396. The examiner can normally be reached on Monday - Friday from 7:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
